June 5, 2019

Dear Concerned Community Member,

The Brazos Valley Council on Alcohol and Substance Abuse (BVCASA) invites you to the eighth annual BVCASA *Strike Out Drugs* Charity Bowling Tournament to be held at Grand Station Entertainment on August 3, 2019 at 11:00 a.m. Your participation will help BVCASA continue to provide the vital drug prevention, intervention and treatment services to adults and youth throughout the Brazos Valley. Please help BVCASA send a strong, drug-free message to our community by assembling a team or becoming a sponsor in this tournament. We are also taking cash donations, donations for the silent auction, and door prizes for our players during the event.

Here are the ways you can help:

- **Be a sponsor for this event.** By sponsoring this event, you show the community that you support BVCASA's efforts. BVCASA will include your name, or your organization's name, in our publicity and event signage, in addition to many other benefits depending on your level of sponsorship.
- **Donate to our silent auction.** The silent auction will be on display and winners will be announced during the event; we will recognize your generous contribution among event participants.
- **Assemble a team to participate in the tournament.** This is a great way for employees to have fun outside of work, and can be an opportunity for you to advertise through company-sponsored bowling shirts. Registration is $25 per person ($100 per team) and includes three games for a four-member team, bowling shoe rental, event t-shirt, a large pizza and 4 drinks.
- **Donate items for door prizes.** Door prizes will be drawn and announced throughout the tournament. This provides a great opportunity to do some marketing and bring in new customers.

A form for sponsorships and/or donations is enclosed for your convenience. You may also register your team online at https://bit.ly/2VaNVtj. For more information, please call Crystal Crowell at 979-846-3560. Thank you for your support!

Sincerely,

Crystal Crowell
Executive Director
